

OVERVIEW

Fandom Hearts is the ultimate insider and information encyclopedia for all things *Kingdom Hearts*. This company is dedicated to providing and reporting as much news and information regarding the Disney and SquareEnix collaboration game series.

DESIGN PHILOSOPHY

The design of the site should be visually appealing with *Simple and Clean*¹ designs. Due to the nature of the series being primarily visual and auditory based, I was planning on having the site reflect that with a rather minimalistic design. Less words and more visuals aids.

Primary Colours

A screenshot of a digital color palette tool. It features five color swatches in a row: red, dark red, orange, light orange, and yellow. Below each swatch is a horizontal bar with a white circle indicating a selected point. A white box with the text "Secondary Colours" is overlaid on the orange and light orange swatches.

The image displays a digital color palette interface with the title "Neutral Colours" centered in a white box. The palette consists of five large color swatches in shades of grey and blue. Below the swatches are three horizontal sliders for adjusting color properties. At the bottom, there are four color information boxes showing RGB and HEX values for the selected colors.
